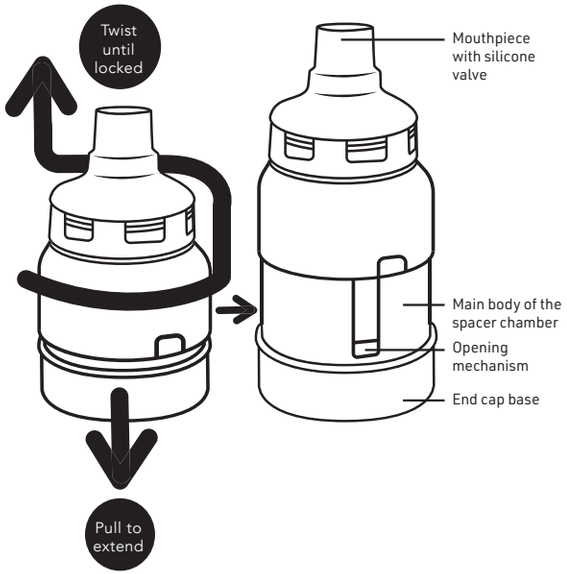
Anti-static Collapsible

Spacer

CLEANING & INSTRUCTIONS FOR USE

SINGLE PATIENT USE



To extend, pull both ends of the spacer, then twist the top section until you hear a click. This will create a secure, locked spacer.

INSTRUCTIONS FOR USE

PLEASE READ AND FOLLOW ALL THE CONTENTS OF THIS LEAFLET BEFORE USING YOUR DEVICE

The Breath-A-Tech® Anti-static Collapsible Spacer is a hand-held, portable valved holding chamber (VHC) that is placed between a pressurised metered dose inhaler (pMDI) and the patient's mouth. The spacer functions as a reservoir from which aerosol medication is dispensed, in order to minimise the delivery of large aerosolised particles to the lungs. By holding the medication after aerosolisation, the spacer reduces the direct delivery of aerosolised particles into the mouth and allows the effective smaller particles to be inhaled and travel to the lower airways. Intended for adults and children to use with most standard pMDIs, in the treatment of ASTHMA or COPD. This device is intended for single patient, multiple use. Intended for use in home, hospitals or clinics environments. Suitable for use with face masks designed to connect with a 22mm diameter fitting.

⚠ WARNINGS	1	2	3	4	5	6
Ensure Instructions for Use have been read prior to use and are kept available at all times. Always follow the instructions provided with your puffer. Ensure the spacer is fully extended and locked into position prior to use. Children must be supervised by an adult or caregiver during use. If breathing problems or symptoms persist, contact your physician and seek prompt medical attention. **REPLACE WITHIN 12 MONTHS OF FIRST USE** Note: The Breath-A-Tech® Anti-static Collapsible Spacer may be disposed of in general waste.	 Pull both ends of the spacer, then twist the top section until you hear a click. Ensure the extension of the spacer is secure before use.	 ⚠ Before use check for any foreign objects, broken or deteriorated parts. Replace the Breath-A-Tech® Anti-static Collapsible Spacer immediately if any damage or missing parts are evident.	 Prepare the puffer by following the instructions provided with your medication.	 Ensure the cap from the puffer has been removed. Push the puffer into the end cap base of the Breath-A-Tech® Anti-static Collapsible Spacer.	 Put the spacer mouthpiece between your lips and make an airtight seal. Depress your puffer and you will see a fine spray inside the Breath-A-Tech® Anti-static Collapsible Spacer. Breathe in and out through the spacer for 4-6 breaths or follow the instructions provided with your puffer, or as directed by your healthcare professional. Always follow the instructions provided with the puffer or your asthma/COPD action plan on how long to wait before repeating this step. Only use one puff from the puffer at a time.	 After use, close the extension of the Breath-A-Tech® Anti-static Collapsible Spacer by holding both ends of the spacer and twisting the top section until you hear a click. Push both ends of the spacer together to collapse. Store in a clean, dry place, away from direct sunlight.

If a replacement leaflet is required, please contact Medical Developments International Limited

CLEANING INSTRUCTIONS

	DISHWASHING METHOD	OR	HANDWASHING METHOD	1	2	3	DISASSEMBLING YOUR SPACER FOR CLEANING To extend the device, pull both ends of the spacer, then twist the top section until you hear a click. Remove the end cap base by placing your thumb in the hole, and pulling the end cap simultaneously. ⚠ Do not remove the mouthpiece and silicone valve.	The Breath-A-Tech Anti-Static Collapsible Spacer should be cleaned weekly in a dishwasher, up to 70°C. Place the end cap base and the spacer on the top shelf of the dishwasher. Position the end cap base flat. Place the spacer in an upright position in the dishwasher, with the mouthpiece facing up.		The Breath-A-Tech® Anti-static Collapsible Spacer should be cleaned at least once a week. ⚠ Do not use a brush or an abrasive sponge to clean the Breath-A-Tech® Anti-static Collapsible Spacer, particularly near the valve area, as this can damage your spacer.	 Wash both parts in warm water with a dishwashing liquid	 Rinse both parts in clean water.	 Shake off any excess water and allow both parts to air dry in a vertical position, with the mouthpiece facing up.	**ASSEMBLING YOUR SPACER AFTER CLEANING** When both parts of the Breath-A-Tech® Anti-static Collapsible Spacer are completely dry, firmly replace the end cap base by pushing onto the spacer. Close the extension of the spacer by holding both ends of the spacer, then twist the top section until you hear a click. Push both ends of the spacer together to collapse.
